01 · ABOUT US

A software company that starts with your way of working

Hisoft IT Solutions Pvt. Ltd. is an IT company from Chhatrapati Sambhaji Nagar, Maharashtra. Since 2018 we have built software, Android apps and websites for schools, colleges, clinics, shops, solar companies, survey firms, housing societies and city services.

We do not sell one-size-fits-all packages. Every project starts with a **requirement study** – we sit with the people who will use the system, map their forms, approvals, roles and reports, and only then design the screens. The result is software that fits the way your organisation already works, in the language your staff speak.

Alongside custom projects we run our own ready products – from **Nagrik Netra** for citizen safety to school ERP, clinic management, billing and visitor management – so clients can start fast and customise what they need.

2018
serving clients since

12
live products & apps

13+
delivered projects

3
languages – **मराठी**, **हिंदी**, English

Mission

Affordable, reliable and easy-to-use technology that gives organisations daily operational clarity, better communication and structured digital records.

Vision

To be the trusted regional partner for mobile workflows, cloud ERPs, education technology, healthcare software and AI-powered public services.

DIRECTORS & MANAGEMENT

One local team, end to end

Requirement study, UI design, Android & web development, testing, Play Store publishing, hosting, training and long-term support – under one roof, a phone call away.

02 · WHAT WE DO BEST

App development, built on requirement-based development

Your workflow comes first, the technology second. We design every app around the people who will use it – officers in the field, teachers in a classroom, a shopkeeper at the counter – and keep the screens simple enough to use from day one.

Android apps

Native-speed Android apps with offline mode, camera, GPS, voice input, notifications and Play Store publishing.

Web apps & PWAs

Browser apps that install on the home screen – one system for phone, tablet and computer.

ERP & admin panels

Role-based dashboards, approvals, registers, certificates and reports that owners actually use.

Integrations & AI

UPI & payment gateways, WhatsApp, SMS, e-mail, maps, Excel import and on-device AI analysis.

HOW A PROJECT RUNS

From your requirement to a live app in six steps

1 Requirement study 2-5 DAYS

We meet your team, map every form, approval, role and report, and study the paper registers you use today.

2 Scope & proposal 1-3 DAYS

A written specification with screens, modules, timeline and a fixed price or milestone plan – no surprises.

3 Clickable prototype 1 WEEK

You click through the main screens on your phone before a single line of code is written.

4 Build in weekly releases 4-12 WEEKS

Every week you test the latest version on a live link and Android APK, and changes go into the next release.

5 Launch & training 1 WEEK

Data import, Google Play publishing, hosting, staff training in Marathi / Hindi / English.

6 Support & growth ONGOING

Bug fixes, updates, backups, new modules and Play-policy updates under a yearly AMC.

Fixed-price project

Defined scope, milestones and a delivery date – best for new apps and ERPs.

Ready product + customisation

Start on one of our live products and add the modules you need.

Subscription / SaaS

Yearly plan with hosting, updates and support included.

Dedicated developer

Monthly engagement for ongoing development and new features.

03 · SPOTLIGHT · OUR LATEST LAUNCH

Nagrik Netra नागरिक नेत्र

See it. Record it. Get it fixed.

A citizen safety and complaint platform for Chhatrapati Sambhaji Nagar. A resident records a live video of a problem – crime, harassment, ragging, potholes, garbage, a water leak, noise. The app reads the video for evidence, sends it to the responsible officer with a deadline, and the citizen tracks every signed update until it is fixed. **Free for every citizen.**

Android app · Web app (PWA) · On-device AI · 18 complaint types · मराठी · हिंदी · English

1 Record live
Video + voice form

2 Evidence found
AI on the phone

3 Right team acts
Deadline per type

4 Citizen tracks
Signed updates

Live video only
No gallery uploads or forwarded clips – every report is real and current.

Two-second SOS
Live location + 5-second video and audio to the control room; silent SOS by double-tap or shake.

Right department, with a deadline
Police, roads, water, fire and ward office – e.g. 2 hours for violence, 24 hours for a water leak.

Anonymous & voice reporting
Speak in **मराठी**, **हिंदी** or English; hide your name for corruption or ragging reports.

AI evidence on the phone
Weapons, faces, number plates, vehicles, fire & smoke, crowds, fights and noise level.

Tamper-proof evidence
Every video fingerprinted (SHA-256 ledger), never editable, every view logged.

Automatic escalation
Missed deadlines rise to the department head, control room and Mayor's priority desk.

Heatmaps for police & city
Evidence packages and area heatmaps show where problems are rising.

Citizens, women & students
silent SOS and anonymous reporting

Police & control room
verified, location-tagged evidence

Municipal corporation
deadlines, escalation and heatmaps

Any city or campus
Hisoft customises it for your organisation

04 · REQUIREMENT-BASED DEVELOPMENT IN ACTION

Case study: Estimate Maker for Ninale Engineers

Ninale Engineers prepare administrative-approval estimates for Soil & Water Conservation works. Each estimate meant days of spreadsheets, hand calculations and drafting.

Their requirement

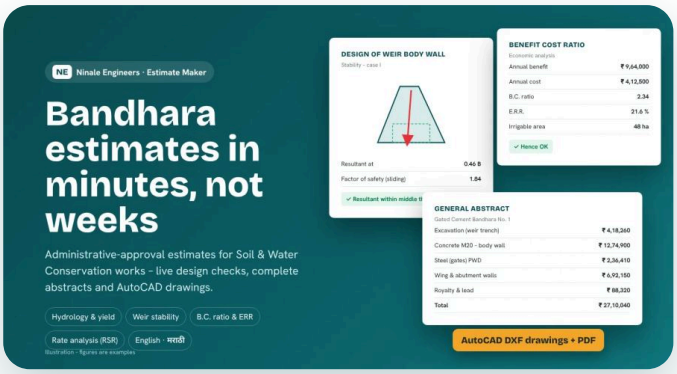

One tool that follows the Government sanction format exactly – hydrology, design, stability, economics, quantities and rates – in English and Marathi, with drawings.

What we built

A web application where the engineer enters the site data once and every section is calculated live. Gated Cement Bandhara today; K.T. Weir, nala deepening and roads next.

The result

A complete estimate – PDF plus AutoCAD DXF drawings – in minutes, calculated the same way every time. One project per site, inputs re-usable for the next.

Open Estimate Maker

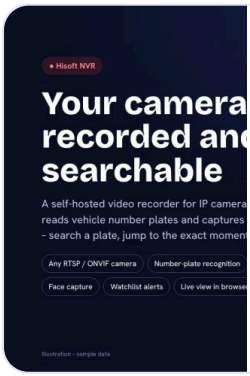

estimate-make.hisofttechnology.com/#/login

hisofttechnology.com/products/estimate-maker

EVERY SECTION THE SANCTIONING AUTHORITY EXPECTS – GENERATED AUTOMATICALLY

- Fund-head sheet & general report
- Rainfall data
- Yield by Strange's table
- Capacity table & bed fall
- HFL / MWL discharge check
- Afflux
- Design flood & energy dissipation
- Weir body wall design
- Wing & abutment wall stability
- Water requirement & irrigable area
- Annual cost & value of produce
- B.C. ratio & ERR with NPV
- General abstract & abstract of cost
- Measurement sheet & steel quantity
- Excavation statement & lead chart
- Royalty & rate analysis (RSR)
- Site-inspection report
- Check list of norms
- AutoCAD DXF drawings
- PDF in English / मराठी

05 · SPOTLIGHT · HSCEXAM.IN

HSC & SSC Exam Forms

Your board exam form, right the first time.

The online board exam form portal at **hscexam.in**. Students and parents fill, pay and track HSC (Std XII) and SSC (Std X) exam forms; colleges verify them and the board approves them – no queues, no paper, no wrong subjects.

4,073	1,317	2,756	3
colleges & schools	HSC institutions	SSC institutions	languages

FROM SIGN-IN TO BOARD APPROVAL

1 Sign in with Google
No passwords; parents can add several students

2 Add the student
Board, college, stream and details – saved for every future form

3 Fill the exam form
Only subjects the college offers; board rules checked live

4 Pay the exam fee
UPI, card or net banking; receipt in the account

5 Verified & approved
College verifies and forwards, the board approves

QR-verified printed form
Every A4 form has a QR code; anyone can confirm it on the Verify page.

Exam calendar & countdown
Open exams, last dates, fees and days left on the home page.

Notice board
Important board notices, dated and labelled.

Fees & refunds
Exam fees, late fees and refund rules explained clearly.

Desks for every role
Student / parent, college or school, board and super admin.

मराठी · हिंदी · English
The whole portal in three languages, mobile-first and SEO-ready.

Students & parents
apply from a phone, in their language

Colleges & schools
verify and forward forms online

Divisional board
approvals, notices and the exam calendar
